

ABDALLAH IBRAHIM ZAID

Full-Stack Developer & CS Student

Kfar Qara, Israel | abdallazeed3@gmail.com

SUMMARY

Passionate Front-End Developer and Computer Science student with a strong technical background in physics, electronics, and algorithms. Proven experience building interactive web applications from scratch and working extensively in diverse Linux environments.

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, C/C++, C#, Kotlin
 - **Frontend/Backend:** HTML5, CSS3, React 19, Vite, React Router 6, PWA
 - **Libraries & Tools:** Git & GitHub, Leaflet, OpenStreetMap, Web Audio, Canvas, Vitest
 - **Operating Systems:** Proficient in Linux (Arch, Debian, Ubuntu, Fedora, Kali, etc.) & Windows/macOS
-

EXPERIENCE

Full-Stack Developer (Trainee)

Masar Program (PreTech) | Remote (2025 - 2026)

- Built and shipped two full-stack web applications from scratch using modern web technologies.
 - Utilized various Linux environments daily for development and system configurations.
 - Completed Dr. Angela Yu's *Full-Stack Web Development Bootcamp* on Udemy (the frontend part).
-

KEY PROJECTS

1. Z-Fahm (Interactive Quiz Platform)

- Developed a fully custom, offline-capable (PWA) quiz app using React 19 and Vite.
- Integrated Open Trivia DB API and a local 98-question database across 12 categories.
- Built a performance analytics dashboard with custom keyboard shortcut accessibility.

2. Tatawo3 65x (Volunteering Directory & Map)

- Created a community platform mapping over 48 volunteer centers in the Wadi Ara region.
 - Integrated interactive maps using Leaflet/OpenStreetMap with advanced filtering and search.
 - Crafted a fully responsive, RTL user interface optimized for Arabic language users.
-

EDUCATION

- **Masar Program (PreTech):** Academic prep, high-tech training, and leadership workshops (2025 - 2026).
- **High School Diploma:** Science Track with intensive focus on Electronics, Physics, and Computer Science.
